CS110 / INDEPENDENCE ROAD

pitch / Paulina Ramirez

Issued: Nov 10, 2026 at 2:25 PM Pacific

Record: FORM-1E014944A937281EB43C386E

Personal public verification code: VIEW-FEFFAE3700CEFF60E81BBD73

Include your own public code with every assignment, even in a team folder. Never submit your private recovery key.

SHA-256: 72ab68b09b1535ffc60d32171dd4faf34f826a3dac3ddc1682266bfb89fc0f0d

Verify the record number at courses.addp2p.com/development-road/independence/index.html?view=verify

An issued record preserves submitted information. It is not a grade or proof of comprehension.

What do you understand about the work and finish line?

I understand that were using Unity to develop a project.

What will you contribute? Name a task or useful capability.

I observed that its important to stay organized and have structure for the project. I also observed that folder structure is important for sharing work and for new people. I can contribute my organization skills. In the past I've structured folders in git repositories and made sure to keep everything organized.

What needs research, support or practice?

Using Unity is something I still need to learn and practice more.

Your available work times and preferred contact method: Discord, email, text, classroom or other. Keep private addresses/numbers outside public exports.

Preferred contact: Classroom

Not available after 5

List your project tools and why you need them.

Unity (to create the project) Chatgpt (for assistance and working quicker) Github (to organize work)

Required: name the AI you will use, its project task and how you will verify its output. Use course-provided/shared or approved local access if needed; no personal or paid AI account is required.

AI: ChatGPT

Task: This AI will help me work more efficiently and help with things like prototyping, code, or when I'm stuck to debug.

Verification: I will verify its output by looking it over and revising any changes
