CS110 / INDEPENDENCE ROAD

Working draft not an issued form / Paulina Ramirez

Issued: Nov 11, 2026 at 4:47 PM Pacific

Record: WORKING-DRAFT

Personal public verification code: VIEW-FEFFAE3700CEFF60E81BBD73

Include your own public code with every assignment, even in a team folder. Never submit your private recovery key.

SHA-256: Not issued. No authentication number. Create the numbered forms in the assignment.

Verify the record number at courses.addp2p.com/development-road/independence/index.html?view=verify

An issued record preserves submitted information. It is not a grade or proof of comprehension.

prep

repo

https://github.com/rlina19/CS110-Paulina

gitTest

I saved a read me to Git and committed it and it worked. What else should I preview?

access

My Git repository is accessible to others.

video1

One useful idea is that mindset is a part of game development. My interpretation is that there are parts to game development. Mindset, structure, documentation, and the actual resources to develop your game.

Question: "How does separating the work into parts help with game development?"

video2

Creativity and innovation is important for game developing. It helps you think outside the box for unique ideas. Its important to persevere and have the right mindset because its important to be able to adapt to change quickly. Keep in mind who are your fans and focus on the fans. Growth mindset: take on challenges, learn from failures, effort, accept feedback, surround yourself with the right people, and don't stop learning. To stay motivated: set clear goals, lists and deadlines. Stay organized.

video3

Folder structure is important because it makes it easier to manage your project and share it with others.

video4

Folder structure is important for documentation for everything to be organized and for new members to see your project .

Question: How can we share our documents with others?

video5

I observed how to start a project on Unity. Open a 3D project and title it the name of yor project. Its important to save this project in the folder with your project. On unity you can see all your assets and all sorts of information on the inspector. One question I have is how to actually make your game do stuff on Unity.

video6

Observations: On Mixamo.com you can get 3d characters and then import them into Unity for your game. You can check your folders through Explorer ad this can also help with folder structure. You can rearrange or fix folders. A folder with your project name should be created to organize everything.

opinion

CS110 / INDEPENDENCE ROAD

This can give us the right mindset to create any project The pipeline will help us turn a new story into something real by providng structure.

questions

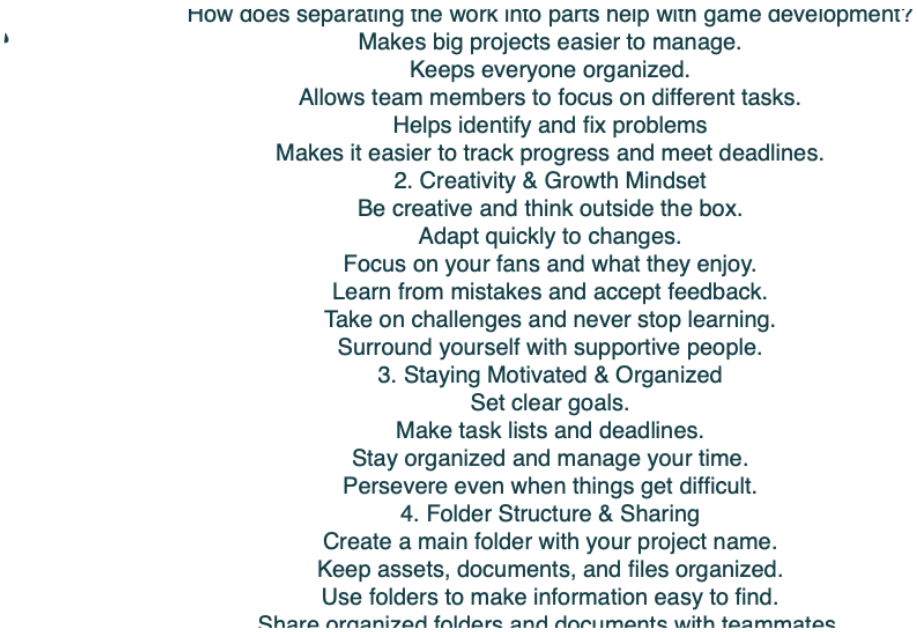

I observed the right mindset to bring to a team/project and know that its important to be motivated and have structure. Folder structure is important for game development.

currentPage

Whiteboard

jgm

pitch

understand

I understand that were using Unity to develop a project.

offer

I observed that its important to stay organized and have structure for the project. I also observed that folder structure is important for sharing work and for new people. I can contribute my organization skills. In the past I've structured folders in git repositories and made sure to keep everything organized.

limits

Using Unity is something I still need to learn and practice more.

availability

Preferred contact: Classroom

Not available after 5

tools

Unity (to create the project) Chatgpt (for assistance and working quicker) Github (to organize work)

CS110 / INDEPENDENCE ROAD

aiTool

AI: ChatGPT

Task: This AI will help me work more efficiently and help with things like prototyping, code, or when I'm stuck to debug.

Verification: I will verify its output by looking it over and revising any changes

Name

ChatGPT

task

This AI will help me work more efficiently and help with things like prototyping, code, or when I'm stuck to debug.

verify

I will verify its output by looking it over and revising any changes

huddle

mission

Story: A user is trying to survive a zombie outbreak. This is a shooting game where you can upgrade weapons as you explore more locations. One playable goal is to escape from one location to the next while surviving by utilizing weapons.

framework

P2P will guide my decisions by helping me structure my plan and giving me the right mindset to follow.

pipeline

Story goal: Survivor escapes zombie outbreak 2026-11-10T12:45 to 2026-11-10T13:45 Pacific

Inputs / assets:Unity, survivor model, environment, weapons 2026-11-10T13:45 to 2026-11-10T14:45 Pacific

Build + configure:Player movement and exit interaction 2026-11-10T14:45 to 2026-11-10T15:45 Pacific

Output/ scenes:Playable escape scene 2026-11-10T15:45 to 2026-11-10T16:45 Pacific

Test + handoff:Test, document, GitHub handoff owner me 2026-11-10T16:45 to 2026-11-10T17:45 Pacific

Future expansion: add zombies, shooting, bigger enviornment 2026-11-10T17:45 to 2026-11-10T18:45 Pacific

This is the goals I will focus on to begin with.

tech

Engine: Unity. Language: C#. Assests: 3d models for characters, weapons, props, and enviornment. I choose these because I want to include many things in my project so ther will be many assests.

Time code

Classes & components

reuse

I can reuse player movement scripts, scenes, and documentation in future versions of the game. These can be used to support upgrades, locations, weapons, etc. I can also reuse characters or assets. I will plan, develop, test, and document my project.

boardNotes

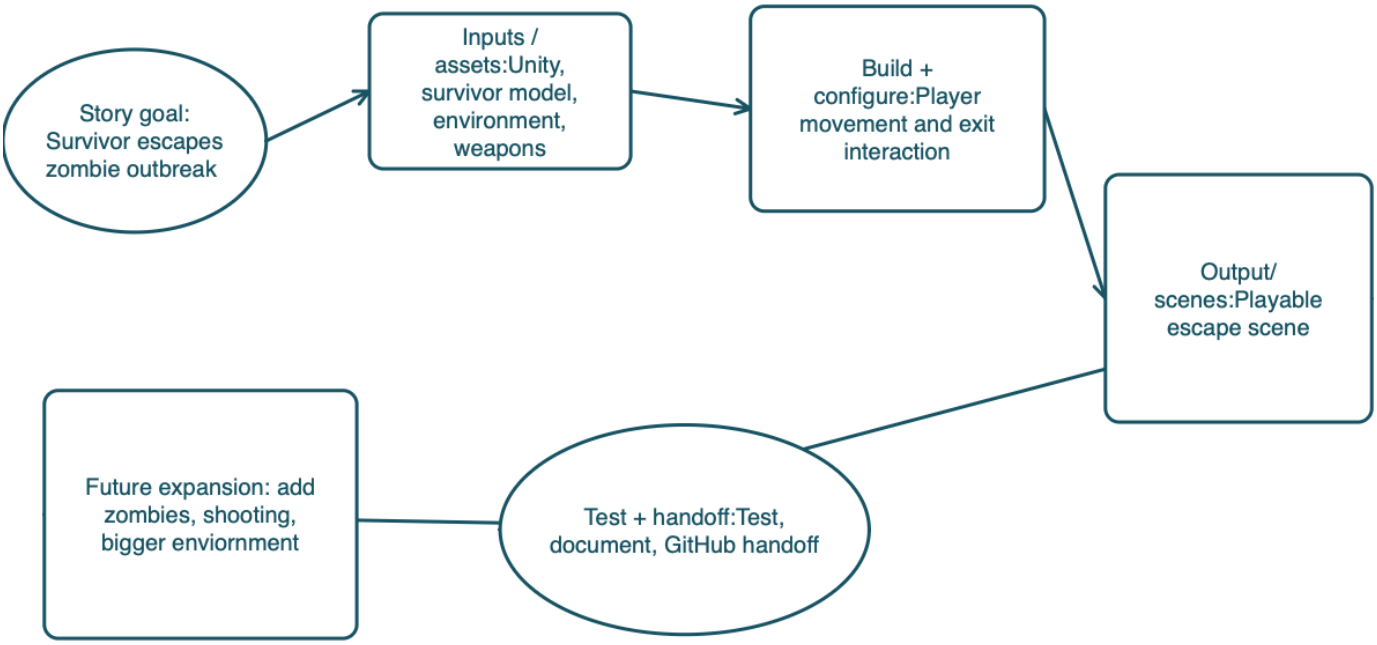

Project: Zombie survival game. Player attempts to escape locations during a zombie outbreak.

- Working solo

- How can I expand the prototype into a larger survival game with a bigger story?

Whiteboard

This is the goals I will focus on to begin with.

Whiteboard

I will keep the project focused on one playable goal, maintain organized documentation, verify AI-assisted code, and test each feature before expanding the project.

CS110 / INDEPENDENCE ROAD

Story Goal: Escape an abandoned location during a zombie outbreak.

Player/Enviornment: Survivor character. Abandoned apartment building.
